

Suction Line Heat Exchangers

Doucette SLHE's are designed for suction to liquid heat transfer in refrigeration applications. They provide liquid subcooling, increase evaporator capacity and provide protection for system compressors. Reinforced tube in a tube construction and high temperature brazed joints ensure vibration and rattle free operation. SLHE's 1/2 through 20 are solid copper while models 25 through 150 are solid steel, ideal for freon and ammonia applications. U.L. Listed.

Copper-Brazed Construction

dii Model Number	List Price	Nominal HP	Packless Equivalent Model	Suction Line (ID)	Liquid Line (ID)	Length (inches)	Shipping Weight (lbs.)
SLHE 1/2	\$40.00	1/2	HXR-25	1/2	1/4	11-1/2	1
SLHE 3/4	\$45.00	3/4		5/8	3/8	11-3/4	2
